The 90-Day Real Estate Team Leverage Blueprint

Find the hours that still run through you.
Pick what to hand off first.
Set up a VA who stays.

Most team leaders know they're buried. Few know by how much.

This blueprint takes about 30 minutes and a pen. When you finish, you'll have four things:

1. **Your number: the hours a week that still run through you or your admin.**
2. **Every recurring task sorted into Keep, Hand Off, or Automate.**
3. **The first three workflows to hand to a VA.**
4. **One workflow written down, ready for a VA to run on day one.**

Fill it in honestly. A guess is fine. A rough number beats no number.

Who this is for

Producing team leaders with an admin or a small team, where routine work still waits on you to explain, check, or approve it.

Step 1: The Hours Audit

List every task that happens at least once a week. Write down who does it now and how many minutes it takes each week.

Task	Who does it now (Me / Admin / Agent)	Minutes per week	Needs my license, judgment, or relationship? (Y / N)
Chasing missing signatures, disclosures, and addenda	Admin	90	N
Transactions			
Chasing missing signatures, disclosures, and addenda			
Uploading compliance docs to Dotloop, SkySlope, or your broker portal			
Sending milestone updates to lenders, title, and co-op agents			
Scheduling inspections, appraisals, and walkthroughs			
Listings			
Entering listing details and price changes in the MLS			
Collecting and sending showing feedback to sellers			
Drafting listing descriptions and just-listed posts			
CRM and leads			
Entering and cleaning contact data in Follow Up Boss, Lofty, or your CRM			
Setting up and updating smart plans and status triggers			
Pulling lead source and pipeline numbers for your weekly meeting			
Team and admin			
Inbox and calendar triage			
Answering "where is this file?" questions from agents			
Onboarding paperwork for new agents			
Vendor coordination (photographers, stagers, cleaners)			
Your own (add 3)			

Total minutes per week: _____

Your Number

Total minutes per week from Step 1: _____

÷ 60 = _____ hours per week

× 50 working weeks = _____ hours per year

Now count only the rows marked N (work that doesn't need your license, judgment, or relationship):

_____ minutes per week ÷ 60 = _____ hours per week that someone else could do

Put a dollar figure on it (optional)

Your gross commission income last year: $_____

÷ the hours you worked last year: _____ = $_____ per hour

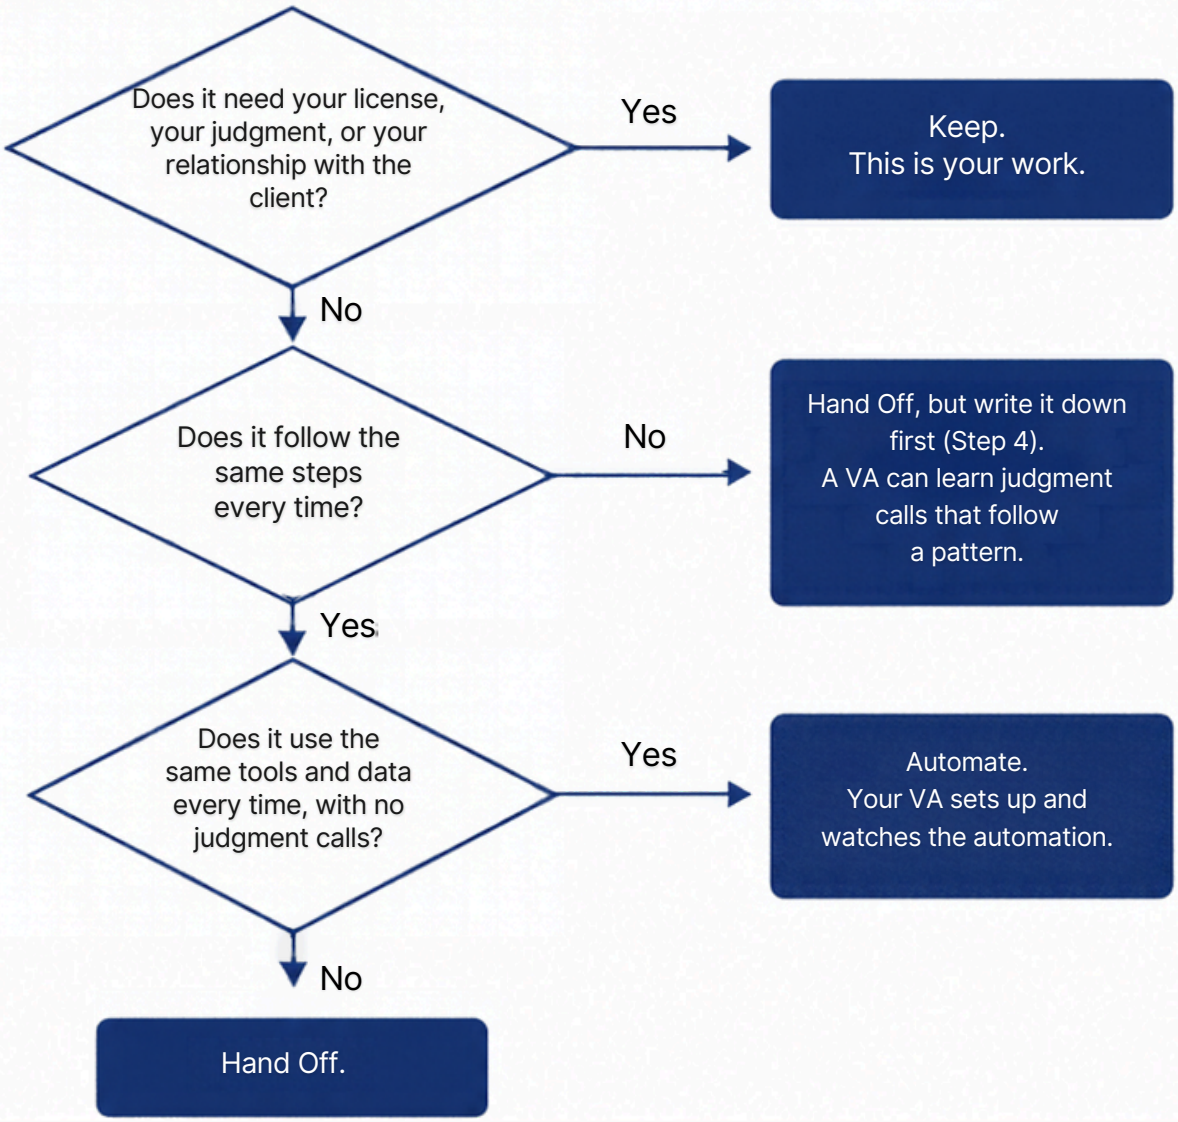

× your "someone else could do it" hours per year = $_____

That's what routine work costs you each year, in your own time.

For scale: industry analyses put about 10 hours of admin work into every transaction. Multiply by your closures last year to check your number.

Step 2: Keep, Hand Off, or Automate

Take every task from Step 1 and run it through three questions, in order.
Write K, H, or A next to it on page 2.

Why the VA owns the automation too

Automation breaks quietly. A form changes, a trigger misfires, a lender emails from a new address. Someone has to notice. Put a person in charge of every automation, and that person isn't you.

Keep: _____ tasks · Hand Off: _____ tasks · Automate: _____ tasks

Step 3: The First Three

Don't hand off everything at once. Pick three tasks marked H or A. Score each one from 1 to 3 on each question, then add the scores.

Task	Takes the most time (1 to 3)	Happens most often (1 to 3)	Low risk if a step is missed (1 to 3)	Total

Your highest total is Workflow 1. Start there.

Step 4: The Workflow Card

Write Workflow 1 down the way you'd explain it to a new hire. If a VA could run it from this card alone, it's ready.

Workflow name: _____

When it starts (the trigger, for example "contract goes pending") _____

Steps

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____

Tools and logins needed: _____

What "done" looks like: _____

Ask me before you: _____ **(the one or two calls you still want to make)**

Most VA hires that don't work out fail at this step, not at hiring. Nothing was written down, so the VA kept coming back with questions and the work slid back to you.

Your First 90 Days with a Vai VA

Week 1

Your date

Your VA starts on Workflow 1, using your Workflow Card.

Day 30

Your date

Review together: is Workflow 1 running without you? What got written down? What got automated? Start Workflows 2 and 3.

Day 90

Your date

Redo the Hours Audit on page 2. Compare it to your first number. Pick the next three workflows.

The goal at day 90 isn't to be done. It's a VA who knows your business and keeps taking on more each month.

Why a Vai VA?

A typical assistant	A Vai VA
Another pair of hands. You still manage every task.	A trained person who owns the work. Managed by us, not you.
AI tools make work faster, and you still review all of it.	Uses AI to move the work faster, with a person checking it.

Hired, trained, and managed by Vai.
You don't become a VA manager. We do that part.

They own the outcome, not a task list.
Hand them the work, not a list of steps to babysit.

AI on your own accounts, with a person in charge.
It reads, drafts, and flags. It never sends anything. A person on your team always presses send.

Your admin keeps their seat.
Your VA takes the chasing off their plate, so your admin can move to the work that makes you money.

Everything gets written down.
If your VA ever leaves, we replace them, and the new VA is up to speed in about two weeks instead of six months.

It is a lot.

If you've read this far, you know it now. This is real work. Every task has to be found, timed, sorted, and written down step by step, while you're still running deals.

Most team leaders who download this won't finish it. Not because they don't care. Because the same thing that keeps them buried keeps them from writing it down: there's no time, and the whole process lives in their head.

That's the part nobody does alone. It's the part Vai does with you.

What changes when we do it with you

— We go through your workflows together

— Your VA starts on Workflow 1 in week 1.

— Your VA writes every Workflow as they learn the work. You don't write it. You approve it.

— We check the work, and add the next workflow once the last one runs without you.

You don't need a finished worksheet to book. You need 15 minutes.

Book your Blueprint Review.

A 15-minute call with Brianne Ika. Bring whatever you filled in, even one page. We'll show you what a Vai VA would take off your plate first.
